Header

Use Case:	<i>Visualize a dashboard</i>
ID:	<i>UC-0005</i>
Description:	<i>A user wants to open the dashboard.</i>
Actors:	<i>User</i>
Stakeholders and Interests:	<i>User, Backend development team, Frontend development team</i>
Trigger	<i>The user clicks on a room in the roomlist.</i>

Pre-Conditions

The user must have opened the website, on its main page, in his browser.

Post-Conditions

The detail page has opened.

Success end condition

The dashboard of the selected room is visible on the detail page.

Failure end condition:

While clicking on a room, the internet connection was lost. -> opening the detail page was canceled.

Main Success Scenario:

1. *The user clicks on the chosen room.*
2. *The detail page opens.*
3. *The dashboard is loading.*
4. *The dashboard visualizes all data to the room.*

Alternative Flow and Exceptions:**Non-Functional Requirements:***Performance*

Loading the dashboard does not take longer than 10 seconds.

Security

Only the dashboard of the chosen room is shown.

User Interface

The user has a good overview over the dashboard, and it is self-explaining.
